GTM Engineering and Revenue Systems

GTM Engineer with 4+ years building CRM automation, API integrations, and AI-assisted workflows. Own 20+ production HubSpot systems, with Salesforce consulting across 15 B2B client accounts.

PROFESSIONAL EXPERIENCE

GTM Engineer | AxisCare

Remote | August 2024-Present

- Own HubSpot-centered revenue architecture across Clay, Gong, Apollo, Aircall, and Chili Piper, translating business requirements into integrations, internal tools, and automation.
- Build and maintain 20+ production HubSpot systems with REST APIs, webhooks, and Node.js, covering routing, record synchronization, deduplication, reconciliation, monitoring, and runbooks.
- Built outbound sourcing, enrichment, ICP scoring, routing, and queue infrastructure that supported approximately \$13.5M in pipeline and \$2.7M in closed-won outbound ARR within two years.
- Built an AI-assisted prospecting and qualification pipeline that added approximately 600 net-new companies in three months and revalidated approximately 10,000 companies, with human approval before CRM updates.
- Built a Fathom-HubSpot workflow to match meetings and consolidate notes and associations, using hash markers to prevent repeat appends and dry-run validation before enabling writes.
- Shipped a self-service app that generates an 18-slide board deck and Excel analysis from HubSpot, reducing preparation from two working days to about 24 minutes, including human review.

Sales Operations Specialist | REVGEN

Remote | February 2022-August 2024

- Owned sales operations, reporting, and data infrastructure for 15 concurrent B2B client accounts and 70 managed sales representatives.
- Delivered Salesforce configuration and consulting across custom fields, permissions, dashboards, and sales workflows; built Google Sheets performance reporting and enriched prospect data for Salesloft.

SELECTED INDEPENDENT PROJECT

GTM Control Tower | Salesforce development-org project using Agentforce, Flow, and Apex for lead triage and operator-approved ownership changes, with permission checks and idempotency.
